

The Ultimate Extreme Look

Imagine walking into a room and having everybody notice your eyes. That's the effect that Crazy Lenses have.

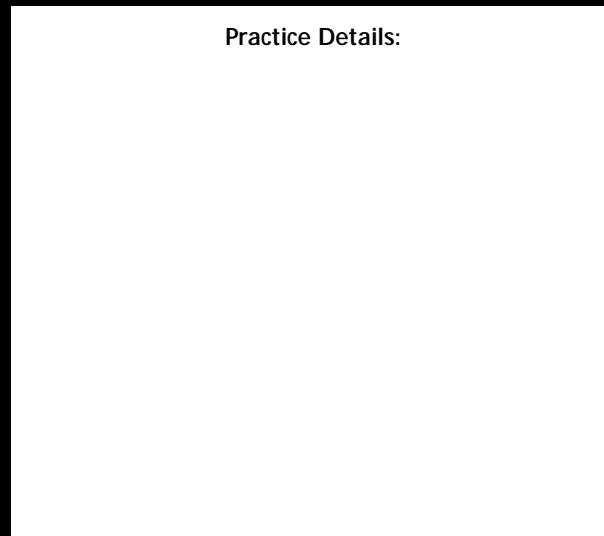

You can't help but get noticed.

With a range that includes over 40 designs, Crazy Lenses create the ultimate extreme look.

Ask your Optician for more information about Crazy Lenses. You'll get advice on the best regime to ensure you look after your lenses and eyes properly and on how to get the most from your Crazy Lenses.

Practice Details:

Get That Crazy Look

Wearer Comfort

Crazy Lenses are made using an advanced manufacturing process ensuring excellent comfort. In fact you will only know you're wearing them by the look of amazement on the faces of the people you meet.

Perfect Vision? - No problem

Even if you have perfect vision and have no need for sight correction you can wear Crazy Lenses. This means that people who do not currently wear contact lenses plus existing wearers can wear them.

Eyes that Glow!

All standard Crazy Lenses that contain the colour yellow glow under UV light. This means that whenever you go near UV light, such as when out clubbing, your eyes will appear to glow! (Excluding monthly disposables.)

Monthly Disposable and Standard Lenses

Crazy Lenses are available in two modalities of wear:

1. Monthly disposable, offering good value on the seven most popular designs. This is the most cost effective way to wear Crazy Lenses if you want to try more than one design. It also promotes better ocular health as you are using a fresh new pair of lenses every month.
2. Standard wear, allows for a more durable lens and a wider choice of designs.

Outrageous Range of Designs

With over 40 designs Crazy Lenses have the widest range of extreme effect contact lenses available, allowing you to create your own range of shocking looks.

Monthly Disposable Lenses

Standard Lenses

Glows under Ultra Violet light.
